Markham Manlift Operator Certification

Markham Manlift Operator Certification - We provide an aerial lift and scissor platform training and certification to empower the trainee with the knowledge and general understanding of the efficient and safe use of "Power Operated Mobile Work Platforms," based on the existing regulations in the industry. Upon successful completion of training, those participating will be able to understand and recognize particular health and safety related hazards connected with making use of aerial and scissor lifts.

There are a variety of affiliated locations within your area providing Manlift Operator Certification Programs. Trainees are provided with in-depth instruction about safe operation and regulations along with extensive hands-on training. The skill level and knowledge of each trainee is assessed and individuals who are capable of demonstrating an acceptable level of operational ability will receive employee documentation and Operator Certification cards.

Theory Training
The trainer would help the trainee through a review of the theory training utilizing lots of visual aids. The trainee would work out of a workbook which covers all the necessary regulations. Other topics like for instance safe operating procedures, different equipment kinds including different associated applications and sizes, pre-use checks and general work place safety are explored individually.

Theory Evaluation
The Theory Evaluation starts with a written test based upon the concepts covered in the operator's reference manual. These graded are graded and returned to the ones training. Afterward the tests are reviewed to ensure understanding and a minimum score of 70% is considered necessary in order to pass this portion of the training.

Practical Training
The hands-on portion of the program is included in the practical training. Here, those training are shown the safe operating procedures, the parking and shutdown procedures and the pre-use check procedures. Each and every one training has the chance to operate the machine and practice the skills they learned throughout Theory Training under the program trainer's helpful eye in an environment which is safety controlled.

Practical Evaluation
The Practical Evaluation is where the ones training are evaluated to assure they have reached a minimum level of skill. The ones training are then assessed on an individual basis using the machinery in a reasonably challenging course environment. As soon as the assessment is complete, the trainees are de-briefed and given the opportunity to deal with any issues they may have about any part of the program. Each employer of a successful trainee would be given the official records and documents soon after the program has been completed.
