Markham Order Picker License

Markham Order Picker License - Order preparation operation or order picking as it is more normally known is a process utilized in warehouse operations and comprises employees referred to as order pickers. The order picker's task is to collect and take articles in particular quantities to accomplish the client's orders prior to shipment. Order picking is an easy warehousing method. The effectiveness in which this particular task is accomplished can be directly linked to a supply chain's productivity. Therefore, order picking is among the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are specific types of order picking which consist of: pick to box method, wave picking method, picker to part method or piece picking, sorting systems method and zone picking method.

The pick to box method involves the order picker filling the box with the items from his or her station. The box then moves to other picking locations until the client order is complete. In this particular process, there is no movement of the order picker workers. In the wave picking method, the order pickers move round to gather the required products for several orders. The piece picking or picker to part method is similar where the order picker or pickers move to gather the items required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, things are brought to the orderpicker by an automatic system like an automatic storage system or a conveyor system. In the zone picking method, every order picker is assigned to one particular area. They are responsible for only realizing order picking within this specific area.
