

Markham Manlift Ticket

Markham Manlift Ticket - The Elevated Platforms and Manlifts Certification program helps to provide the needed training on the work practices, safe operating procedures, regulations and rules regarding the daily activities for the operators of this equipment. The program has been designed for people who are actively involved in these activities or individuals who have a basic knowledge of this machine.

Aerial platforms and manlifts have become common and integral machinery in industrial settings in the past few decades. These machines provide an easy way to lift workers close to what needs to be done on a stable platform apparatus, allowing employees to perform tasks with greater safety and comfort rather than being perched on top of scaffolding or ladders.

Similar to every other device, manlifts are only safe when they are utilized properly. As they elevate workers above floor or ground level, accidents could easily take place and this can result in serious injuries or death for both the manlift operators as well as any passerby who may not be lucky enough to be standing below.

There are various kinds of manlifts. The majority fall into 1 of 2 categories: the articulating boom lift, which has the capability of both vertical and horizontal movement and the scissors lift, which is capable of moving upward and downward.
